

Trec Classes

RULES AND REMINDERS

FIELD BASED TREC Body protectors must be worn. An air jacket if worn must be over a traditional body protector. This is due to the solid fences being included in the course as well as obstacles to go under, over or through.

ARENA BASED TREC Body protectors are recommended.

Trec Guidelines:

MA (Control of paces) – The rider enters a marked corridor in as slow a canter as possible and maintains the pace and then returns along the same corridor in as fast a walk as possible.

A maximum of 30 points available for canter and walk (score will be halved in line with Trec GB rules).

A break in pace or a foot outside the corridor scores zero. (In some of the more novice classes the Canter is replaced with trot for the MA.

In a Leadrein class the corridor is 25m long.

In Hand classes there is no MA section).

Cross Country Trials (PTV) –10 simulated obstacles which you might come across while out riding set up in the arena.

Each obstacle is scored out of 10.

All obstacles are optional. Where an obstacle is missed out the score is zero for that obstacle.

The course is timed. Riders will be stopped if they run out of time.
